

Dear Commission,

I am concerned that the new "localism" plan you are proposing would adversely affect the ability of my favorite radio station, KLOVE, to operate in my area. KLOVE is listener supported and one of the few non-commercial Christian stations in our area. It is of great benefit in our community to have these healthy, positive choices on the air. Although KLOVE is not local here, we do get information about local events and news from a perspective not presented on other stations. It is nice to have a station I can turn on and not have to worry about that my kids will hear objectional song lyrics or violent newscasts. KLOVE and its supporters can't afford to support a local radio station in each area that they reach now with FM translators if LPFM were to displace it. Please reconsider your plan to do away with FM translators! Thank you!
